CIVICVOICE / ASSIGNMENT 03 / 6 NOVEMBER 2026

Flutter Profile review

Kingsben and your assisting agent. Verify the current screens, reproduce defects and complete one slice at a time.

Flutter Profile and Citizen standing only. Use web as read-only reference. Francis owns API, access policy and production configuration.

Task branch codex/flutter-kingsben-profile-review

PR target codex/flutter-latif-review-fixes

Agent guide docs/flutter-team/KINGSBEN_PROFILE_AGENT.md

1 / Profile across roles

Check Citizen, Guest, Municipal, Ministry, Maintenance and both Admin tiers. Verify identity, editable fields, role-specific preferences and Back from About, Notifications and Change Password. Keep the accepted grouped rows and logout confirmation.

2 / Name editing and save feedback

Cover validation, cancel, keyboard, duplicate taps and late responses after an account change. Distinguish acknowledged success, definite rejection and an unconfirmed save. Keep entered text and preserve session guards.

3 / Citizen standing

Check Home and Profile agreement, refresh and resume, stale responses and Guest exclusion. Use isolated low, fractional, highest and missing-value fixtures. Preserve server thresholds and the accepted compact Home layout.

Evidence and delivery

Cover both themes, 320/390/412/768 px and 1x/1.5x/2x text. Run affected tests, the full Flutter suite, analyzer and whitespace checks before pushing. Log exact results and keep phone and owner acceptance separate. Open one PR to the working branch for Francis to review.

Update docs/flutter-alignment/KINGSBEN_PROFILE_PROGRESS.md as you go. Work with fixtures and preserve existing account data, reports and drafts.
